

Virtual or Remote Instruction Plan

Addendum

To ensure that all students have access to sufficient broadband, and to any technology required for virtual or remote instruction, the Wharton Borough Public School District will provide each student with a Chromebook device. Additionally, the District has contracted with Optimum/Lightpath to provide each student with internet access to their school issued device when not in the school setting. Among other safeguards, Go Guardian has been purchased and installed to further the safe use of technological devices and the internet.

Student families will be surveyed for additional needs/information and may submit additional needs and/or requests to the District.

The Wharton Borough Public School District will be prepared to provide meals to students in the event of virtual or remote instruction. Communication will be sent to parents outlining dates and times for meal pick up and meals will be appropriately packaged.

As noted in our Re-Opening and Recovery Plan, virtual or remote school days will coincide with the regular school day hours, inclusive of time for lunch and recess.
